

NETHAN SUPAKITCHUMNAN

Utrecht, Netherlands | Nate@digitalnomad.jp | +31(62-928-8989) | LinkedIn | Github

Graduated with a master's in Data-Driven Design, combining creative problem-solving with rigorous analytical skills. Experienced in applied data science, predictive modeling, stakeholder analysis, and human-AI interaction. Proven ability to translate complex data into actionable insights across domains such as emergency services, personal data privacy, and behavioral analytics. Adept at deploying ethical, user-centric, and privacy-aware solutions. Seeking to contribute to data-driven decision-making in forward-thinking organizations.

SKILLS

Languages: Python, SQL, HTML, CSS

Tools & Frameworks: AWS, Git, Tensorflow, PyTorch, scikit-learn, ML flow

Applications: Machine Learning, ML Ops, LLMs, Gen AI, reinforcement learning, NLP, computer vision, casual inference, prompt engineering, fine-tuning, data visualization

Professional Experiences

Stitching Nederlandse Datakluis | Utrecht, Netherlands

Data-Driven Designer

- **Led the design research and implementation of three AI-enabled prototypes** (dashboard, chatbot, and voice assistant) to improve public engagement with personal data, resulting in a **45% increase in user-reported clarity** on data usage during usability testing.
- **Developed and evaluated a Retrieval-Augmented Generation (RAG) system** integrated with LangChain, FAISS, and ElevenLabs, achieving **95% retrieval accuracy** on user-stored data queries and demonstrating real-time explainability and transparency.
- **Facilitated iterative user testing across three design sprints**, incorporating feedback from over **20 digitally literate participants**, which led to a **60% improvement in task completion rates** and enhanced alignment between system design and user expectations regarding data ownership and privacy.

Projects

Personal Data Pod Chatbot (Github) (Streamlit)

- **Designed and deployed a RAG-powered chatbot** using LangChain, FAISS, and ElevenLabs to enable contextual querying of personal data; achieved **92% user satisfaction** in testing
- **Engineered chatbot prompts for transparency, clarity, and conciseness**, incorporating conversational guardrails to ensure responsible and user-aligned responses.

Fine-tuning LLM model (Github)

- **Fine-tuned a lightweight LLM using PEFT techniques**, optimizing for domain-specific data with only 0.1% parameter updates, resulting in a **43% reduction in training loss** and enabling efficient on-device deployment with a **memory footprint under 2GB**.

Education

M.A. Data Driven Design, Utrecht University of Applied Sciences

B.S. Industrial Design, California State University, Long Beach

Certification

AWS Certified Cloud Practitioner

Github Foundation Certification – DataCamp

Data Analytics – Coursera by Google
